DEEPKNOWLEDGE™ DISCOVERY SERVICES

Introducing advanced search capabilities for uncompromised learning & research

A state-of-the-art discovery search tool, the DeepKnowledge™ Discovery Service is a comprehensive e-library integration designed for excellence in research and learning outcomes.

As a holistic e-library resource, it includes every feature that goes behind the making of a successful e-library platform:

- ✓ Focused discovery search
- ✓ The best link resolver
- ✓ A full-functioning library e-resource manager
- ✓ An institutional repository
- ✓ A built-in citation matcher
- ✓ Remote access & authentication
- ✓ A fully customizable library portal
- ✓ Prompt customer support

KEY FEATURES THAT PROPEL THE ULTIMATE RESEARCH & LEARNING EXPERIENCE

Massive Central Index

DeepKnowledge™ Discovery's central index is focused on scientific research materials from leading publishers and aggregators that are renowned for their high quality and reliable-peer reviewed literature (including curated content).

Unique Search Algorithm

Its best in practice search algorithm retrieves the most targeted and relevant search results, thereby discarding any “noise” results that usually get in the way. This enhances the search efficacy and ensures the ultimate user experience.

Content Agnostic Discovery Service

DeepKnowledge™ gives paramount importance to the quality of content it indexes, thereby supporting superior learning.

The content that ranks high on its search is the most authoritative one, uninfluenced nor skewed towards any specific publisher – ensuring no compromises.

Link Resolver

The Link Resolver provides one of the best and deepest article level linking possibilities that are available in the market today.

It is characterized by utmost consistency and accuracy. Moreover, it is fully OpenURL compliant and works smoothly with other citation databases as well as Discovery Searches.

About DeepKnowledge™

DeepKnowledge™ is a user-friendly e-library platform developed by TechKnowledge. Trusted by over thousands of students, researchers, medical practitioners and library patrons worldwide, the portal renders efficient control to manage libraries, while extending the most authoritative electronic resources and learning solutions.

Packed with powerful features and prompt support facility, the cost-effective SaaS solution incorporates leading technology to deliver flexible e-library management and hosting solutions. While the e-library solution supports detailed personalization, it can be setup with great agility, leaving no technical hassles of software maintenance to the library management.
